

GrowPad

All Purpose Liquid Fertilizer (NPK) 10-4-8+TE+AA

GrowPad is a concentrated fertilizer supplying the main essential nutrients including nitrogen, phosphorus and potassium combined with chelated form of micronutrients along with a good amount of amino acids. The proportion of each element is specific to the needs of the plant allowing an improvement in the overall nutritional status of the plant. This product is specifically adapted to the balanced nutrition, stimulation and the growth of the vegetative and reproductive systems.

Benefits:

- Fast and complete absorption.
- Increasing yield and quality of the plant.
- Providing all essential amino acid compounds in one formula.
- Increasing plant resistance in stress conditions.

Composition (W/V) %

N	8
P ₂ O ₅	4
K ₂ O	10
Fe	0.18
Mn	0.05
Zn	0.16
Cu	0.04
Amino Acids	1.2

Application Rate

Crop	How to use	Dosage	Time
Fields Crops	Foliar Application	3 - 4 kg/ha	3 times during the growing stages
Fruit trees	Foliar Application	2 Liter per 1000 liters of water per hectare	3 times during the growing stages
Vegetables	Foliar Application	2 Liter per 1000 liters of water per hectare	After each harvest stage
Fruity vegetables	Foliar Application	2 - 3 Liter per 1000 liters of water per hectare	3 times during the growing stages
Ornamental plants	Foliar Application	2 Liter per 1000 liters of water per hectare	2 times during the growing stages
Fields Crops	Fertigation	5 – 10 liters/ha	Early growing season
Fruit trees	Fertigation	10 - 15 liters/ha	The first stage of irrigation
