

Padena MicroMix Plus

Powdered Chemical Fertilizer with Micronutrients + Nitrogen & Magnesium

Padena Micromix Plus is a solid chemical blend containing carefully balanced ratios of nitrogen, magnesium, and micronutrients in sulfate form. This formulation meets a significant supply of the crop's nutritional needs for micronutrients, magnesium, and nitrogen simultaneously.

Benefits:

Highly water-soluble , ensuring efficient application

Enhances the reproductive phase of field and orchard crops

Compatible with various fertilizers for soil and pit applications

Provides sulfur , an essential nutrient for all agricultural crops

Prevents and treats leaf chlorosis caused by micronutrient deficiencies in calcareous soils

Stimulates chlorophyll production and improves photosynthesis

Composition %

Water Soluble	
N _t	3.7
MgO	3.5
B	0.5
Fe	7
Mn	4
Zn	5
Cu	1

Application Rate

Crops	How to use	Dosage	Time
Vegetables	Soil Applications	7 - 10 kg/ha	At the 7 leaves Stages and one month later
Seed trees	Soil Application	0.5 - 1 kg for each Tree	Early growth stage
Seed trees	Foliar Application	2 - 4 Kg/ha	3 times during the growth stages
Fruit trees	Soil Application	0.5 - 1 kg for each Tree	Early growth stage
Greenhouse plants	Soil Application	2 kg per 1000 square meters	Surface spreading before plowing
Fields Crops	Soil Application	15 – 20 kg/ha	Spreading the surface before plowing and repeating as a road
Fields Crops	Foliar Application	3 - 5 kg/ha	3 times during the growth stages
Pistachio	Soil Application	1 - 2 kg for each Tree	Early growth stage
