

# Agri-Plus

## Enriched Chicken Manure Fertilizer

Agri-Plus is extracted liquid poultry manure that contains a good amount of nitrogen, phosphorus, potassium and micronutrients, amino acids, humic acid and fulvic acid. According to company history in a variety of extraction method for humic substances, Agri-Plus is an extraction by special methods to preserve organic compounds in high quality and maximum purity. The liquid poultry manure might be applied in all plant growth stages in all irrigation methods. This product is enriched with macro and micronutrients which makes a good organomineral compound for the farmers.

Poultry manure has long been recognized as perhaps the most desirable natural fertilizers due to its high nutrient and biostimulant content. Its application is recommended for field crops, gardens, green houses and ornamental plants. The use of Agri-Plus is an integral part of sustainable agriculture.

### Benefit

- Increases the activity of beneficial soil microorganisms
- Increases resistance to environmental stresses
- Increases the absorption of essential nutrients
- Accelerates germination

### Composition (W/V) %

N	2.4
P <sub>2</sub> O <sub>5</sub>	1.2
K <sub>2</sub> O	2.4
OC	18

## Application Rate

Crop	How to use	Dosage	Time
Field Crops	Fertigation	30 – 50 liters/ha	After clawing and repeating a month later
Corn	Foliar Application	40 – 60 liters/ha	6 to 8 leaves stages and repeat one month later
Vegetable	Foliar Application	60 – 80 Liters/ha	leaves Stage and repeat one month later to 8 6
Seed trees	Foliar Application	20 - 50 Liters/ha	The beginning of the growing season in spring
Pistachio	Foliar Application	60 - 80 Liters/ha	The beginning of the growing season in spring
