

NutriPad 20-20-20 Liquid

Nutripod 20-20-20 is a series of liquid chemical mixed fertilizers of Padna Company. This fertilizer can have nitrogen, phosphorus and potassium for all agricultural products. In the production of this fertilizer, high-quality raw materials without sodium and chloride ions are used and therefore, this fertilizer composition can be used in fertigation and foliar application without worrying about leaf burn.

Benefits

- All components are came from the best quality and 100% soluble.
- Can be used as fertigation or through foliar application.
- Can be used on all crops needs in different stage/s of plant growth.
- Free from sodium, chloride and heavy metals, suitable for salty and sensitive plants to chlorine.
- Suitable for horticultural and farming crops.

Composition (W/V)%

N	20
P ₂ O ₅	20
K ₂ O	20

Application rate

Crop	How to use	Dosage	Time
Fields Crops	Fertigation	7 - 8 liter/ha	3 times during the growing stages
Fields Crops	Foliar Application	2 - 3 liter per 1000 liters of water per hectare	3 times during the growing stages
Fruit trees	Fertigation	10 - 12 liter/ha	once every two weeks
Fruit trees	Foliar Application	2.5 - 3 liter per 1000 liters of water per hectare	3 times during the growing stages
Vegetables	Foliar Application	2 liter per 1000 liters of water per hectare	After each harvest stage
Fruity vegetables	Foliar Application	3 liter per 1000 liters of water per hectare	3 times during the growing stages
Ornamentals/ flowers	Foliar Application	2 liter per 1000 liters of water per hectare	2 times during the growing stages
