

NutriPad 15-8-15

Nutripod Granule 15-8-15 is in a series of granular solid chemical fertilizers of Padena Company. Adjusted proportions of nitrogen, phosphorus and potassium in this fertilizer provides a complete and efficient package of nutrients required for all agricultural products. The slow and gradual release of macronutrients is one of the salient features of this fertilizer, which enables the plants to access the main nutrients throughout the growing season.

Benefits

- Supply nitrogen, phosphorus and potassium for all agronomic and horticultural crops
- Gradual and continuous release of nutrients throughout the growing season
- Reducing the leaching of nutrients in the fertilizer

Composition (W/V) %

N	15
P ₂ O ₅	8
K ₂ O	15

Application Rate

Crop	How to use	Dosage	Time
Field crops	Spreading or line application in the soil before plowing	150 – 300 kg/ha	Before or at the same time as sowing

Fruit trees	Soil application	1 to 5 kg for each tree trunk	In winter or early spring
